REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The closest prior art is Perez. However, Perez fails to provide the requisite motivation to practice the in vivo or ex vivo methods of treating a female reproductive system using sphingosine-1-phosphate, since the methods of Perez only teach protection of isolated oocytes in vitro. The prior art fails to suggest the in vivo or ex vivo methods instantly claimed with a reasonable expectation of success.

NOTE: The double patenting rejection will be maintained in the child application to allow this application, which was filed early, to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
